

QUALITY ASSURANCE MANAGER

Job location: Marietta, GA

Full-time contract

Country: United States

Creapharm Clinical Supplies is a brand-new subsidiary of the French company Creapharm group, one of the European leaders in clinical trial supply services. We focus on providing qualitative and outstanding services like clinical secondary packaging and cold chain management to deliver safely IMP's (non-commercial drugs) to major healthcare centers. We believe our success lies in our personal relationships, trust and transparency.

Working closely with the Head of Quality system, the depot manager and the operational team, the quality assurance manager will be responsible for:

- Revising and approving SOPs
- Management of deviations/complaints and work with responsible parties to ensure timely completion
- Management of subcontractors and suppliers
- Ensuring all training records and job descriptions are complete for all employees involved to ensure compliance with Creapharm's internal procedures
- Management of internal audits and reports
- Client audits and inspection (CAPA management)
- Follow-up of qualification of equipment, premises and computerized systems
- Management of action plans and their follow-up
- Implementation of annual quality reporting and key performance indicators + follow up
- Archiving of quality documents
- Performance of tasks essential to the job function may require the employee to be part of the day-to-day operations in temperature-controlled environment
- On-call duty may be required
